

ENGAGED AND EMPOWERED CITIZENS

Through
Measurable Outcomes in Planning

ENGAGED AND EMPOWERED CITIZENS

Focus on outcomes

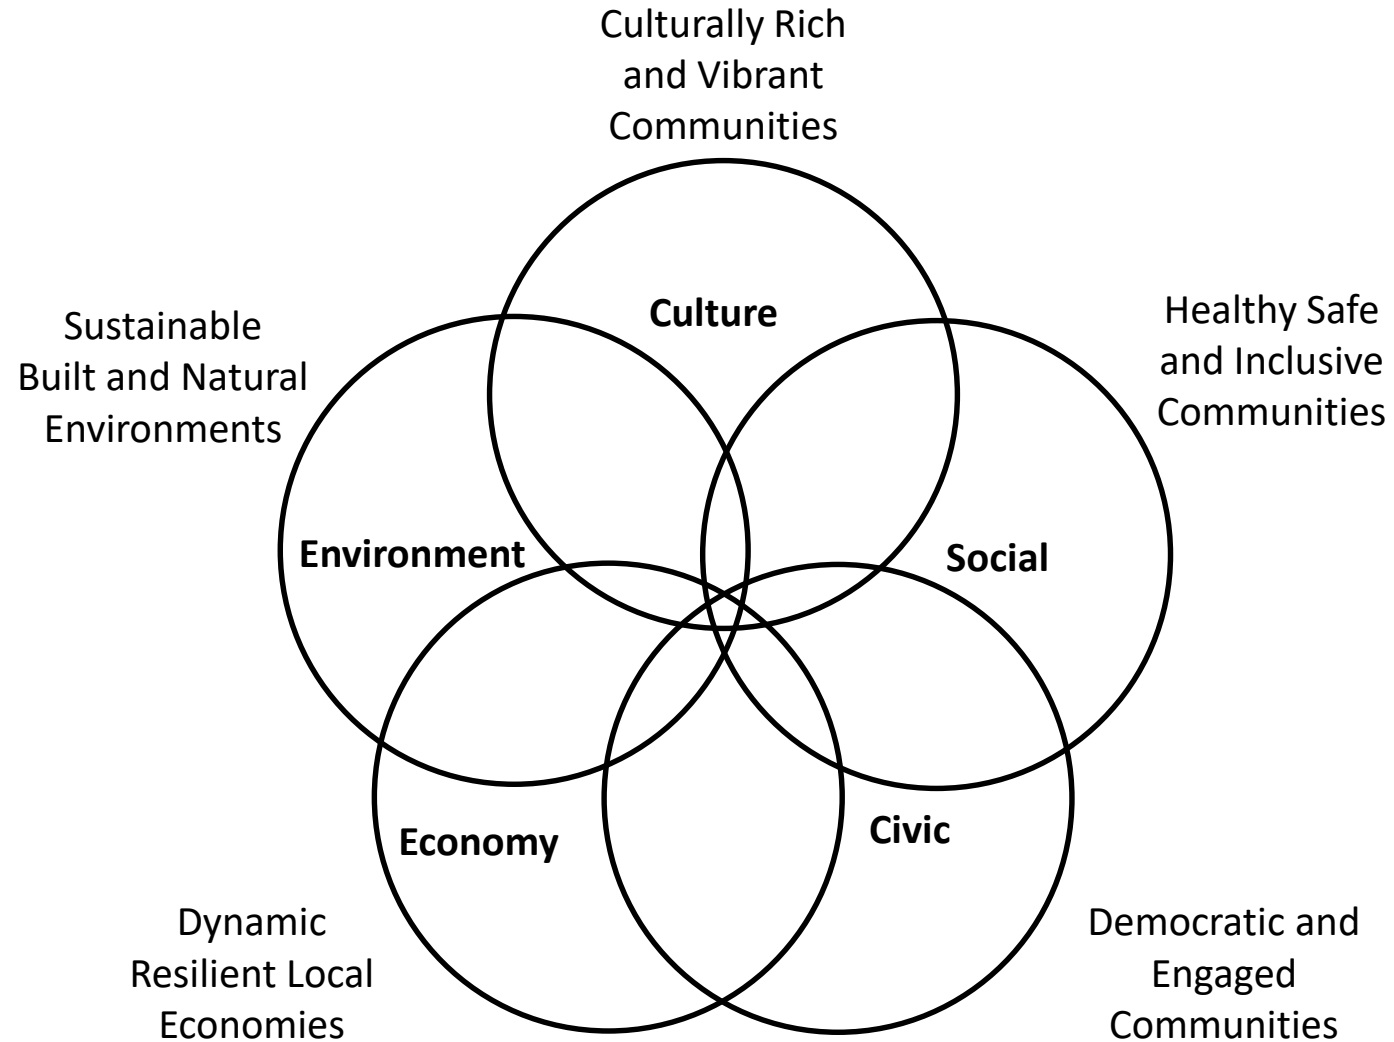

And measure progress

Not inputs, *how much are we spending*

Not outputs, *and more activities*

Domains of public policy

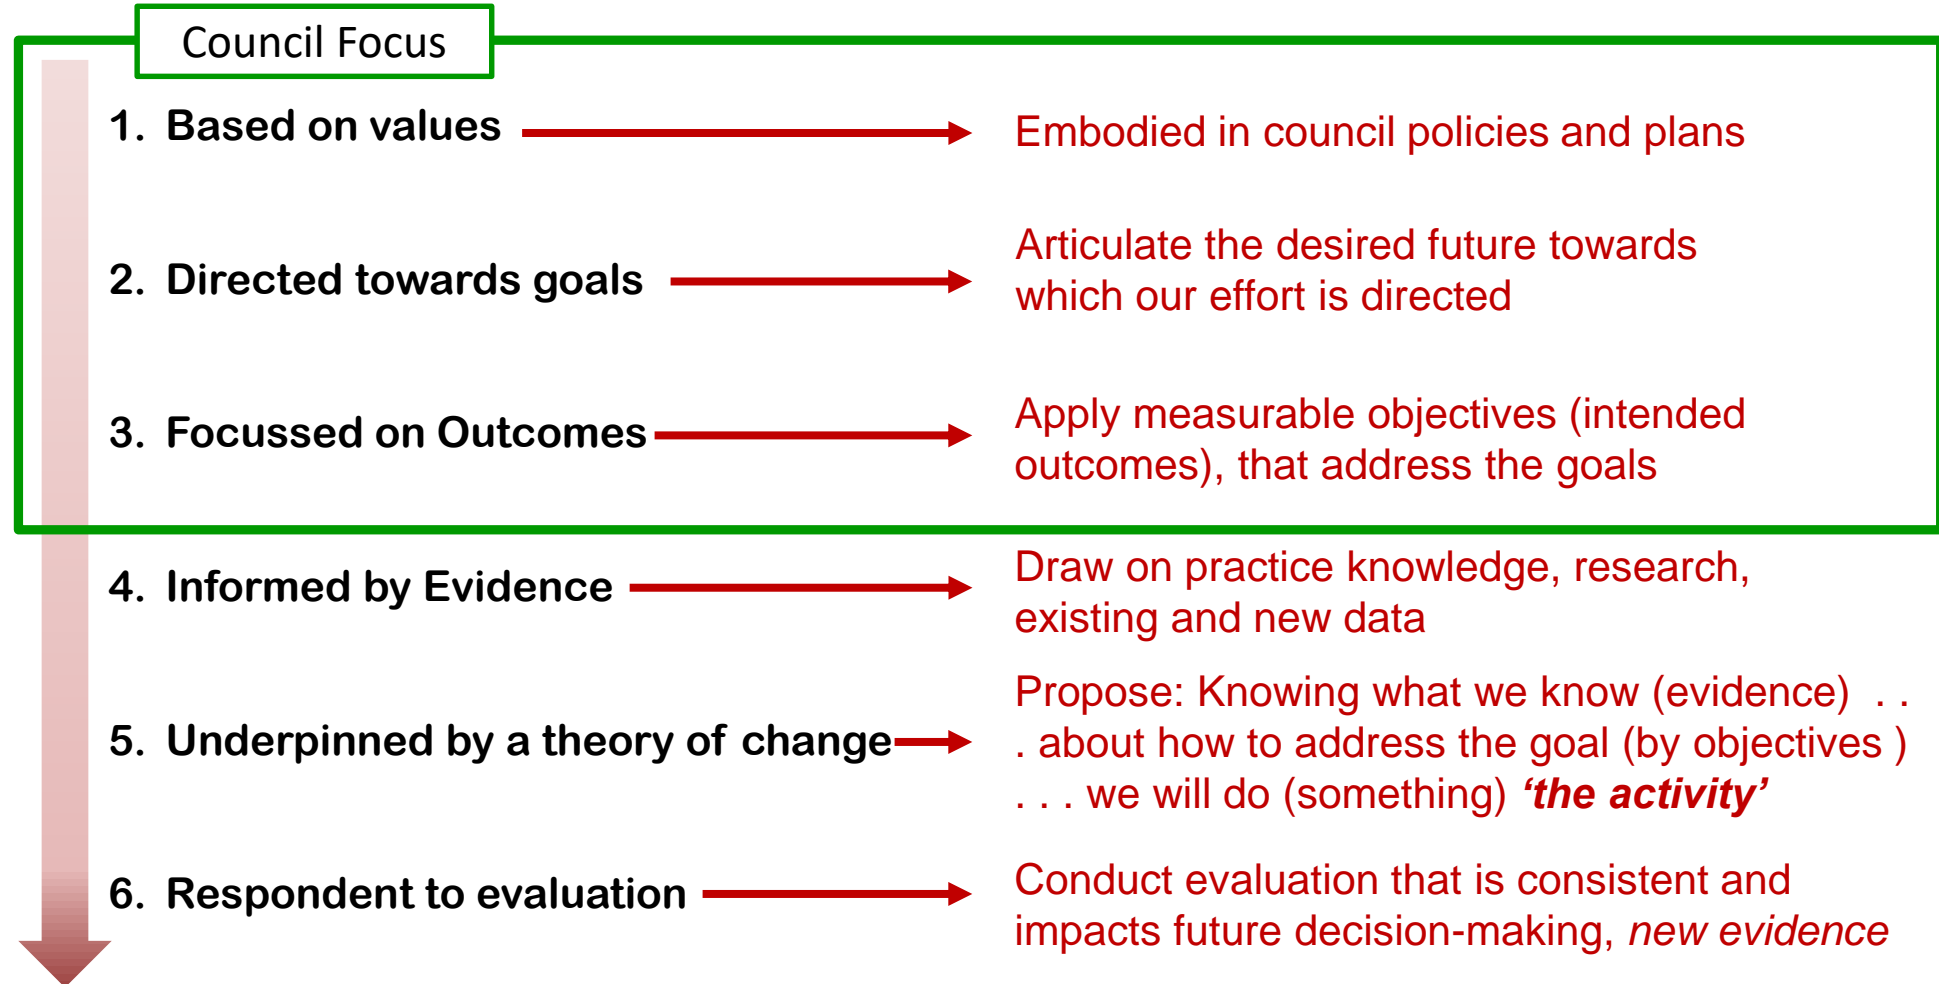

“Words matter”

Key terms, their meaning and use for consistency

Values	the collective <i>values</i> (positive and negative) of the community that will influence planning
Goal	the desired long-term future: the focus toward which effort is directed
Intended Outcome	a specific <i>objective</i> to achieve, within a timeframe and available resources, that addresses the goal
Evidence	What do we know about the state of the goal and this outcome, where are we now, what initiatives have been effective, what processes have contributed?
Theory of change	Knowing what I know about the best outcome that will address the goal, we will do this activity
Activity	the thing (output) done to reach an outcome through an application of resources (inputs)
Outcome	what actually occurs is measured to determine whether the objective (intended outcome) was reached.

Six planning principles

How they are applied

1. Based on values

. . . we cannot know what a society's values are, except by observing their manifestation. (Hawkes, 2001)

NOTE: Distinct from the operational values of the council that are about how they do their business, with terms such as transparency, efficiency, responsibility. These form the basis of how organisations work, but not what it works for.

1. Based on values

Community values vary in degrees from positive through to negative

- participation, engagement and democracy;
- tolerance, compassion and inclusion;
- freedom, justice and equality;
- peace, safety and security;
- health, wellbeing and vitality
- creativity, imagination and innovation;
- love and respect for the environment.

(Hawkes, 2001)

Four ways the council ingest the values from across the community

- community consultation (meetings, surveys etc.);
- elected representatives;
- council executive and staff;
- existing documentation, i.e. council plans;

2. Directed towards goals

Introducing the Wonderland Shire

- A model council
- Population 19,500
- One main township and several villages
- Coastal economy (tourism, seafood and agricultural export)
- Two hours from a capital city

2. Directed towards goals

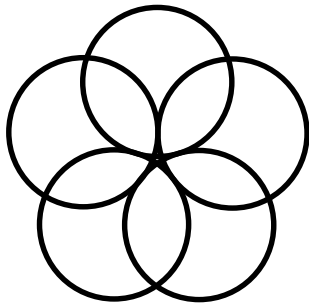

Wonderland Shire is a municipality with the following goals:

- A safe, clean and healthy environment
 - Abundant local jobs and economic opportunities
 - Strong, clear and transparent corporate governance and leadership
 - Effective and valued civic and cultural infrastructure
 - A resilient and connected community
 - A connected and creative community with improving health and wellbeing
-

How do we measure progress towards those goals?

Draw on measures from the public policy domains

Cultural: Culturally Rich and Vibrant Communities

Social: Healthy Safe and Inclusive Communities

Economic: Dynamic Resilient Local Economies

Environmental: Sustainable Built and Natural Environments

Civic: Democratic and Engaged Communities

2. Directed towards goals

Aligning council goals to domains of public policy

Wonderland Shire aims to be a municipality with:

- A safe, clean and healthy environment
Environmental
- Abundant local jobs and economic opportunities
Economic
- Strong, clear and transparent corporate governance and leadership
Civic
- Effective and valued civic and cultural infrastructure
Civic – Cultural
- A resilient and connected community
Social
- A connected and creative community with improving health and wellbeing
Cultural - Social

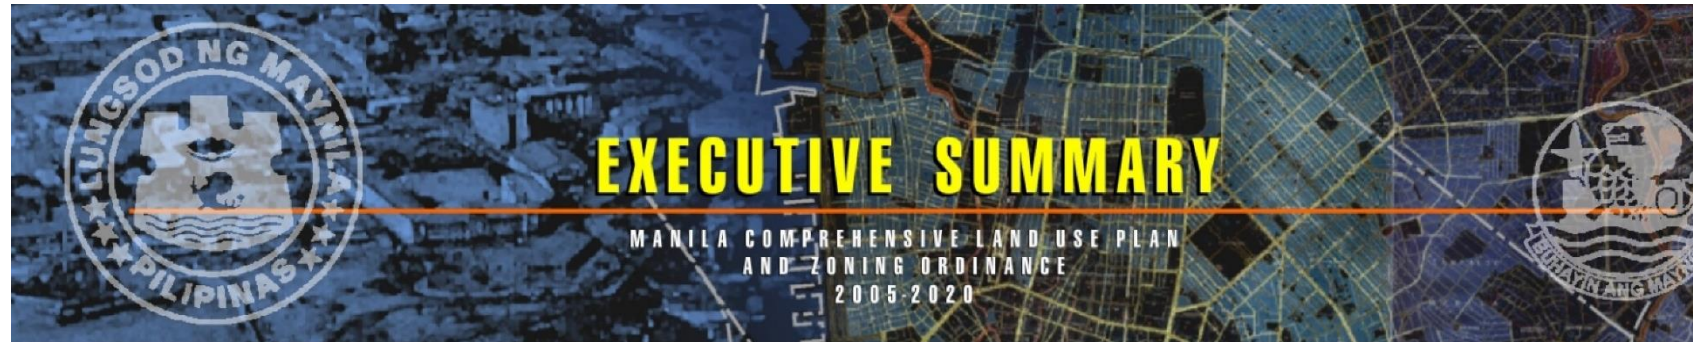

If council's goals are not clearly articulated, they need to be found

CULTURAL TOURISM DEVELOPMENT PLANNING

CIFAL Jeju, UNITAR, South Korea May 2017

1. Based on values and 2. Directed towards goals

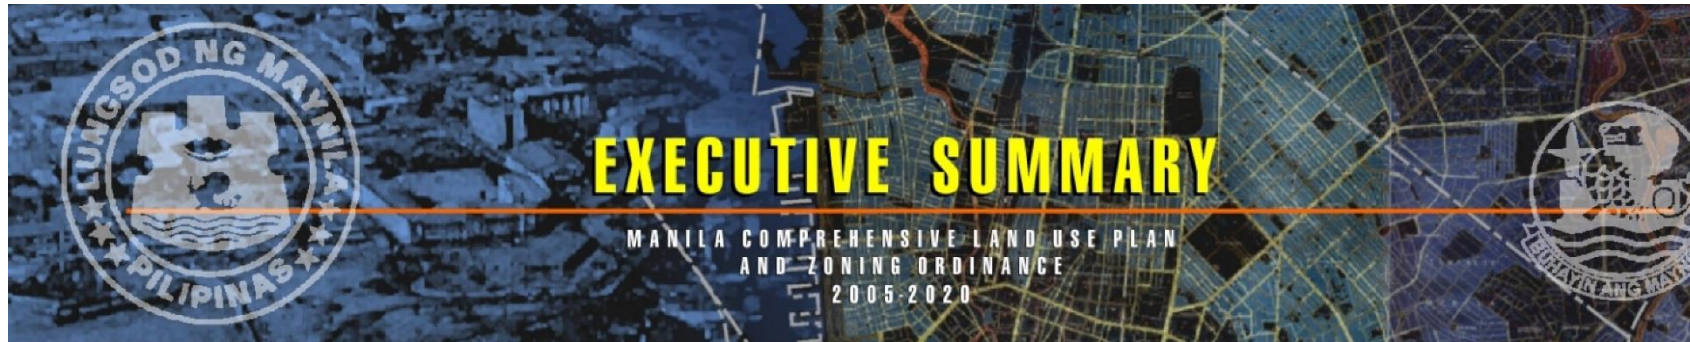

Along with creating new opportunities to improve the quality of life and the economic well-being of a city, growth and change, if not well-managed, can threaten the elements of a city that its residents cherish the most. The challenge, which the city is faced with, is the continuance of the waterfront development and pushing it into the inner core of the city and spreading it evenly on the whole city. As the city appreciates again the beauty of Manila Bay, the Manileños stand ready to rediscover the waterfront, to link it once again to its downtown and the rest of the city via a network of open spaces and the redevelopment of the Pasig River.

Goal: A quality of life cherished by its residents

Goal: Sustainable economic growth and change (replacing well-being with sustainability)

1. Based on values and 2. Directed towards goals

After a thorough review and inspection of the city, it is recognized that the City of Manila has been transforming from one image to another that is trying to recapture its past glory as one of the most beautiful cities in the world

Goal: One of the most beautiful cities in the world

2. Directed towards goals

Aligning council goals to domains of public policy

Goal: A quality of life cherished by its residents

Cultural - Social

Goal: Sustainable economic growth and change

Economic

Goal: One of the most beautiful cities in the world

Environmental - Cultural

3. Focussed on outcomes

Selecting measurable outcomes to address the goal

3. Focussed on outcomes

Consider intended outcome to address the goal

What you aim to achieve within a timeframe and available resources?

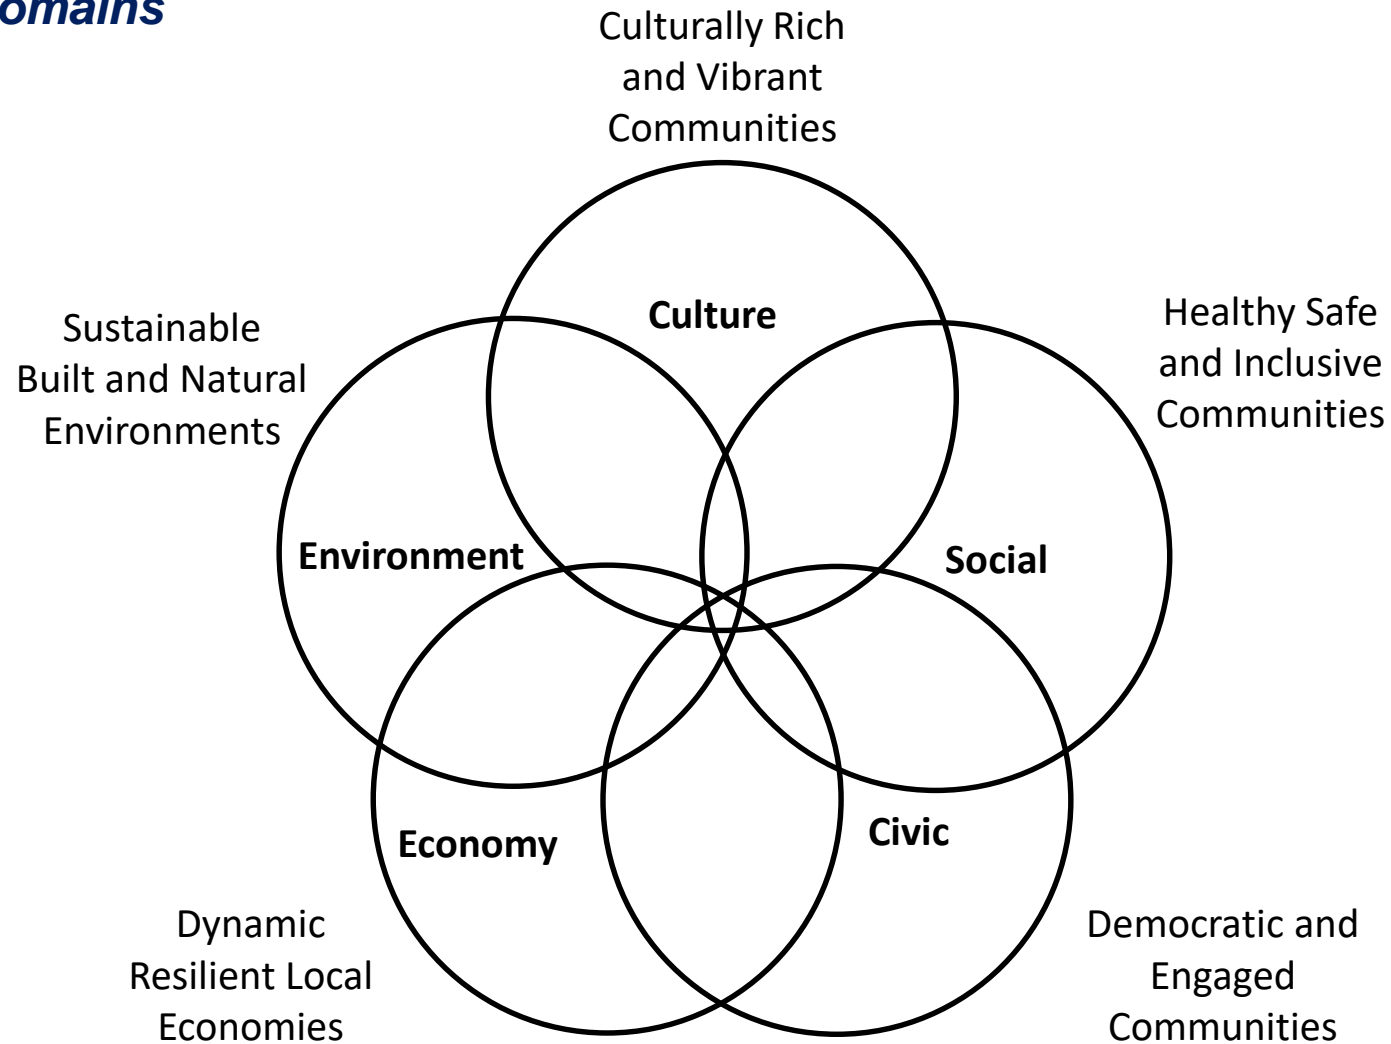

Outcomes are often confused with activities (outputs)

For example, 'to run a festival' is not an outcome. This is an activity, through which a council might realise a particular outcome.

2014 - Desktop survey of 95 Australian cultural datasets told us little about local government's contribution to Australia's cultural life. The Cultural Forum agreed start the process of designing a new dataset.

Measurable inputs, outputs and outcomes of
engagement in cultural development activities

Planning foundation 1.
There are five domains
of public policy

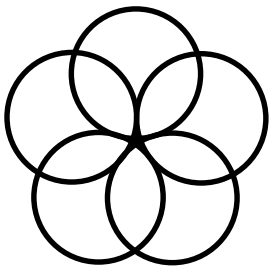

Planning foundation 2.

There are three key datasets that provide the metrics for evaluation

Dataset	Definition	Examples
Inputs	The resources that are available	<ul style="list-style-type: none">• Buildings, collections, significant sites• Financial and human resources
Outputs	The commitments and actions	<ul style="list-style-type: none">• Plans and policies• Activities i.e. projects and programs
Outcomes	The consequences of commitments and actions	<ul style="list-style-type: none">• Milestones toward desired future• Intended outcomes is reached

Five public policy domains
economic, social, environmental, civic & cultural

Three dataset types
inputs, outputs, outcomes

Dataset	Definition	Examples

Economic	Social	Environmental	Civic	Cultural
Inputs	Inputs	Inputs	Inputs	Inputs
Outputs	Outputs	Outputs	Outputs	Outputs
Outcomes	Outcomes	Outcomes	Outcomes	<i>Intrinsic?</i>

Instrumental

Measurable cultural (*intrinsic*) outcomes of engagement in cultural development activities

Creativity stimulated (Stimulation)

Sparkling of the imagination, creativity, curiosity;
resulting in increased desire to participate more and/or create new cultural works

Aesthetic enrichment experienced (Enrichment)

Experiences (familiar or unfamiliar) that come through the senses and are special and outside the everyday; feelings of being moved that are evoked by experiences such as beauty, joy, awe or wonder.

New knowledge, insights and ideas gained (Insight)

Generation of intellectual stimulation, critical reflection and creative thinking experiences.
Desired endpoint is deeper understanding, which is unlimited and can be continually generated.

Cultural diversity appreciated (Appreciation)

Appreciation of different forms of cultural expression: the diverse ways that people express themselves from their life experience and interests, and the interactions between those expressions are valued.

Sense of belonging to shared heritage experienced (Belonging)

Illumination of the present through a sense of continuity with the past, and a pathway to the future, through connections to present and past. History, heritage, cultural identity shared.

www.culturaldevelopment.net/outcomes

What are the measurable outcomes of engagement in cultural development activities across the other domains of public policy?

Measurable ***economic*** outcomes of engagement in cultural development activities

Measurable ***social*** outcomes of engagement in cultural development activities

Measurable ***environmental*** outcomes of engagement in cultural development activities

Measurable ***civic*** outcomes of engagement in cultural development activities

What are the measurable outcomes of engagement in cultural development activities across the other domains of public policy?

Measurable *economic* outcomes of engagement in cultural development activities

- Employment-enhancing skill development facilitated
- Individual economic benefit obtained
- Direct employment provided
- Indirect employment stimulated
- Local business patronised

** Refer to current council measures and measurable outcomes if they exist*

What are the measurable outcomes of engagement in cultural development activities across the other domains of public policy?

Measurable *social* outcomes of engagement in cultural development activities

- Good physical and mental health stimulated
- Sense of safety and security supported
- Recognition from valued others experienced
- Social capital increased (bonding, bridging or linking)

** Refer to current council measures and measurable outcomes if they exist*

What are the measurable outcomes of engagement in cultural development activities across the other domains of public policy?

Measurable *environmental* outcomes of engagement in cultural development activities

- Positive sense of place in the built and natural environment engendered
- Valued connection to the natural world inspired
- Awareness of ecological issues raised
- Contribution to neighbourhood character, including regeneration, made

** Refer to current council measures and measurable outcomes if they exist*

What are the measurable outcomes of engagement in cultural development activities across the other domains of public policy?

Measurable *civic* outcomes of engagement in cultural development activities

- Sense of community belonging or civic pride enhanced
- Useful connections between groups in the community increased
- Sense of a positive future for community inspired
- Active citizenship, leadership stimulated

** Refer to current council measures and measurable outcomes if they exist*

Measurable cultural (*intrinsic*) outcomes of engagement in cultural development activities

Creativity stimulated (Stimulation)

Sparkling of the imagination, creativity, curiosity;
resulting in increased desire to participate more and/or create new cultural works

Aesthetic enrichment experienced (Enrichment)

Experiences (familiar or unfamiliar) that come through the senses and are special and outside the everyday; feelings of being moved that are evoked by experiences such as beauty, joy, awe or wonder.

New knowledge, insights and ideas gained (Insight)

Generation of intellectual stimulation, critical reflection and creative thinking experiences.
Desired endpoint is deeper understanding, which is unlimited and can be continually generated.

Cultural diversity appreciated (Appreciation)

Appreciation of different forms of cultural expression: the diverse ways that people express themselves from their life experience and interests, and the interactions between those expressions are valued.

Sense of belonging to shared heritage experienced (Belonging)

Illumination of the present through a sense of continuity with the past, and a pathway to the future, through connections to present and past. History, heritage, cultural identity shared.
