

Workshop

Research Development for Local Government

Have Your Say!

The Local Government Transport & Roads Research & Innovation Program (LG TRRIP) is a joint initiative between WALGA and Main Roads Western Australia. The program is funded through the State Road Funds to Local Government Agreement and delivered with the assistance of the National Transport Research Organisation (NTR0).

OUTLINE

This workshop will introduce the Local Government Transport and Roads Research and Innovation Program (LG TRRIP). Participants will then work together to identify, discuss and prioritise opportunities for future research.

PURPOSE

LG TRRIP is shaped by the real-world experience of local government practitioners like you. This workshop is your chance to share the issues and challenges you're facing on the ground, and to help guide targeted research that can make a practical difference in your work.

Start talking to your colleagues about the challenges facing your organisation. Dream big and imagine the future of Western Australia as you would like to see it.

WHO SHOULD ATTEND?

Focus Area: Sustainability, Asset Management and Structures

Local government staff responsible for managing transport assets, bridges, culverts, and delivering projects incorporating sustainable transport.

Focus Area: Safety and transport

Local government staff responsible for managing transport assets, providing connected and safety transport solutions for residents.

The hybrid event is both online and in person at NTR0's West Perth office.

FACILITATORS

[Mark Bondiotti](#)

Policy Manager Transport and Roads - WALGA

[Desiree Hamann](#)

WARRIP Agreement Manager - NTR0

[Doug Bartlett](#)

Principal Engineer - NTR0

Places are limited - secure your spot now.

Come prepared to share your perspectives and bring your colleagues into the discussion.

WHAT YOU NEED TO KNOW

LG TRRIP has been delivering practical guidance to local government since 2023. NTRO has been working with WALGA and local government representatives to identify and deliver research that is easy to apply to your day-to-day activities. We encourage collaboration throughout to ensure all stakeholder input is considered.

TOPICS/PROJECTS

LG TRRIP has delivered a variety of transport research projects such as:

Completed

Catalogue of Standard Pavement Profiles for Local Government roads in WA

Investigation of Road Data Collection Technologies for Local Government

Crumb Rubber Modified Binders in sprayed seal applications on Local Government roads in WA

Reclaimed Asphalts Pavement in asphalt applications on Local Government roads in WA

Design and Construction Guidelines for the use of Crushed Recycled Concrete on Local Government Roads in WA

Low-Cost Road Safety improvement for rural Local Government roads in WA

Considerations for Sealing Local Government Roads in WA

Sustainable road construction practices for Local Government roads in WA

Coming soon...

Intersection Safety Rating Tool (Planning and Discovery)

Marginal Materials for Road Construction & Maintenance on Local Government Roads in WA

Crumb Rubber-Modified Binders in Asphalt Applications on Local Government Roads in WA

Guidelines for selection of seals within asphalt layers for Local Government roads in WA

WHAT ARE WE LOOKING FOR?

Research projects can take many forms, but they are all grounded in solving real-world problems. What we need from you is a clear understanding of your needs and the issues that matter most in your day-to-day work.

You might have problems that start like this:

- I am not sure how to...
- My Council needs us to...
- Our community expects us to...
- We have seen many accidents when...
- We have tried it, and it didn't work...
- Current specifications do not cover...

We work with you to translate these challenges into outcome-focused research projects—delivering training, guidance, specifications, trials or data management solutions that are practical, evidence-based and beneficial for all.
