

INTRODUCED CORELLA WING TAGGING STUDY REPORTING FORM

The little corella *Cacatua sanguinea* and the eastern long-billed corella *Cacatua tenuirostris* are not native to southern Western Australia but have become established as a result of aviary escapees. The Department of Environment and Conservation (DEC) is undertaking a wing tagging study to determine the movements of these birds throughout Perth's Metropolitan area.

If you sight a bird with a wing tag please record the details on this form and forward to DEC via fauna@dec.wa.gov.au or by mail to Locked Bag 104, Bentley Delivery Centre 6983.

Tag colour _____ Black, Pink, Blue, Green, Gold, Other or Unsure

Tag code _____ e.g KO, 4B, OP or Unsure

Date _____

Location the tagged bird was seen-

Suburb _____

Street _____
