

B5. External Funding Opportunities

From year to year funding opportunities for on-ground works are available through federal or state government agencies and non-government agencies such as Lotterywest, Telstra and Conservation Volunteers. Regular checks for external funding opportunities are recommended. There are a few 'grant search' directories available online:

- The Grants Directory, available at: <http://grantsdirectory.dlgrd.wa.gov.au/> is a compilation of grants and other assistance programs available to communities and local governments in regional and metropolitan WA. The directory contains programs provided by WA and Commonwealth Governments as well as private sector organisations. The directory contains links, where possible to websites of organisations providing assistance.
- *Grantsearch* is a comprehensive Australian funding database and is available at <http://www.grantsearch.com.au/>. It details opportunities from all sectors with sources of financial support for study, travel, research, business, the arts, sport, and community projects. There is a small cost for subscribing.
