Victorian Greenhouse Alliances – Local Governments Working Together on Climate Change

Karen Gardham
Project Manager
Northern Alliance for
Greenhouse Action (NAGA)

What are Greenhouse Alliances?

- What we do
 - Knowledge sharing and capacity building
 - Projects and research
 - Advocacy
- Differences between Alliances

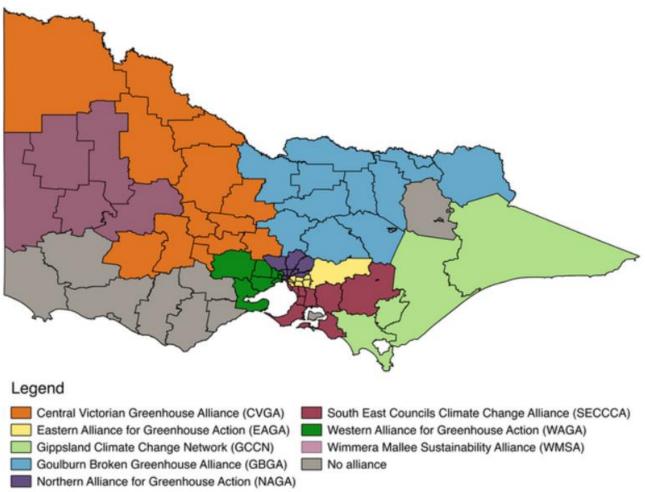

http://www.victoriangreenhousealliances.org/

Who are the Victorian Greenhouse Alliances?

Needs updating – most grey now gone!

Governance of Victorian Greenhouse Alliances

- Two main models
- MOU
- Funding
- Decision making
- Dedicated secretariat
- Work for our members

Benefits

- Attract large sources of FUNDING
- DIRECT \$ SAVINGS to council through projects/advocacy
- Identify and achieve EFFICIENCIES & ECONOMIES OF SCALE
- COORDINATE projects that are valuable to more than one council
- Leverage ADVOCACY POTENTIAL
- Even-out RESOURCE DISPARITIES/CAPACITY CONSTRAINTS
- SCALE UP successful local projects
- Attract PARTNERS and enable Collaboration
- Leveraging KNOWLEDGE for everyone

Victorian Greenhouse Alliance Annual Conference 2019

- 270 attendees
- "great variety of topics to choose from"
- "one of the best [presentations]
 I've ever heard"
- "it's like catching up with family"
- "great speakers who went in detail and were frank about what worked and didn't work"

Development of BSW Alliance

- Sustainability Officers network
- Ad hoc regional projects
- Climate resilient communities project 2012
 2017, state government funded
- Funding submission to state government through regional climate change adaptation team
- First year of new Alliance establishment
 - Funding
 - Governance
 - Learning from other models

What do you want from an Alliance?

- Do you want a:
 - Service delivery mechanism;
 - Way of knowledge sharing;
 - Community of practice;
 - o "Think tank";
 - Advocacy voice;
 - Innovation hub;
 - o All of these things?

Lessons

- Build the case through joint working
- Identify economy of scale savings but don't become beholden to these
- What are your gaps in state government relationships that could be bridged through an Alliance – advocacy; funding
- Be clear about what your Alliance is and what it isn't
- Acknowledge that different councils within an Alliance are at different stages, with different appetites and levels of ambition - understand where each council is at and which language works for them and tailor messages and value propositions
- Councils need to participate it won't run itself without member involvement
- Ensure you build support with a diversity of different players within each council so if key people leave or become politically exposed then you have deeper roots to rely on

Things to think about

- What benefits do you get from any existing informal network and what more do you think you could do with a dedicated resource, in knowledge sharing but also scaling up your work together?
- What support does your LGA provide with this already?
- What support do relevant departments at the WA Government provide local government?
- Are you interested in advocacy to other levels of government; what advocacy do you do already?
- Do you have a community that are supportive of climate change action?
- Do you have Councillors and senior management that are supportive of climate change action?
- How can you leverage one for the other?
